Hydrobiologia **387/388:** v–ix, 1998.
E. Wurdak, R. Wallace & H. Segers (eds), Rotifera VIII: A Comparative Approach.

Contents

Preface ..... xi–xii

Dedication: Birger Pejler
by Elizabeth Wurdak, for the family of rotiferologists xiii
List of participants and photo ..... xiv–xv

Part I. History of Rotifer Research

History of rotifer research in northern Europe
by B. Pejler 1–8
An analysis of taxonomic studies on Rotifera: a case study
by H. Segers 9–14

Part II. Taxonomy, Biogeography and Biodiversity

Zooplankton may not disperse readily in wind, rain, or waterfowl
by D.G. Jenkins & M.O. Underwood 15–21
Freshwater Rotifera of the genus *Lecane* from Songkhla Province, southern Thailand
by P. Pholpunthin & S. Chittapun 23–26
Rotifera of some freshwater habitats in the floodplain of the River Nan, northern Thailand
by L. Sanoamuang 27–33
On a new species of *Keratella* (Rotifera: Monogononta: Brachionidae)
by Yan Zhuge & Xiangfei Huang 35–37
Floodplain biodiversity: why are there so many species?
by R.J. Shiel, J.D. Green & D.L. Nielsen 39–46
Rotifer diversity in a central Mexican pond
by S.S.S. Sarma & E.-G. Manuel 47–54
Rotifers new to Florida, U.S.A.
by P.N. Turner & H.L. Taylor 55–62
Dicranophoridae (Rotifera) from the Alps
by C.D. Jersabek 63–77
Remarks on the rotifer fauna of north and northwestern Russia
by L.A. Kutikova 79–82

Part III. Phylogeny

Review paper: The evolutionary relationships of rotifers and acanthocephalans
by J.R. Garey, A. Schmidt-Rhaesa, T.J. Near & S.A. Nadler 83–91
Opinion paper: Are lemnisci and proboscis present in the Bdelloidea?
by C. Ricci 93–96
Numerical phenetic taxonomy and its heuristic aspects
by T. Nogrady 97–100
Phylogenetic relationships of phylum Rotifera with emphasis on the families of Bdelloidea
by G. Melone, C. Ricci, H. Segers & R.L. Wallace 101–107
Cross-mating tests rediscovered: a tool to assess species boundaries in rotifers
by R. Rico-Martínez 109–115

Part IV. Anatomy and Morphology

Preparation of rotifer trophi for light and scanning electron microscopy
by W.H. De Smet 117–121
Stereopictures of internal structures and trophi of rotifers
by W. Kleinow 123–129
The rotifer corona by SEM
by G. Melone 131–134
Catecholaminergic neurons in the brain of rotifers
by E.A. Kotikova 135–140

Part V. Ecosystem Ecology: Lentic Systems

Review paper: Rotifer responses to increased acidity: long-term patterns during the experimental manipulation of Little Rock Lake
by T.M. Frost, P.K. Montz, M.J. Gonzalez, B.L. Sanderson & S.E. Arnott 141–152
Review paper: Rotifers in arctic North America with particular reference to their role in microplankton community structure and response to ecosystem perturbations in Alaskan Arctic LTER lakes
by P.A. Rublee 153–160
Rotifer vertical distribution in a strongly stratified lake: a multivariate analysis
by X. Armengol, A. Esparcia & M.R. Miracle 161–170
Influence of environmental factors on the rotifer assemblage in an artificial lake
by M. Devetter 171–178
Rotifers in relation to littoral ecotone structure in Lake Rotomanuka, North Island, New Zealand
by I.C. Duggan, J.D. Green, K. Thompson & R.J. Shiel 179–197
Zooplankton succession and thermal stratification in the polymictic shallow Müggelsee (Berlin, Germany): a case for the intermediate disturbance hypothesis?
by B. Eckert & N. Walz 199–206

Comparison of processes regulating zooplankton assemblages in new freshwater pools
by T.A. Holland & D.G. Jenkins 207–214
Effects of turbidity and biotic factors on the rotifer community in an Ohio reservoir
by A.I. Pollard, M.J. González, M.J. Vanni & J.L. Headworth 215–223
Differences in rotifer populations of the littoral and sub-littoral pools of a large marine lagoon
by A. Saunders-Davies 225–230

Part VI. Ecosystem Ecology: Lotic Systems

Review paper: Rotifers in interstitial sediments
by J.M. Schmid-Araya 231–240
Effects of contrasting land use on free-swimming rotifer communities of streams in Masurian Lake District, Poland
by J. Ejsmont-Karabin & M. Kruk 241–249
A study of rotifers in the River Thames, England, April–October, 1996
by L. May & J.A.B. Bass 251–257
Planktonic rotifers of Samborombón River Basin (Argentina)
by B.E. Modenutti 259–265

Part VII. Chemical Ecology

Review paper: Chemical ecology of rotifers
by T.W. Snell 267–276
Differential sensitivity of *Synchaeta* and *Daphnia* to nucleosides from *Anabaena affinis*
by J.J. Gilbert 277–281
Toxicity of the Chrysophyte flagellate *Poterioochromonas malhamensis* to the rotifer *Brachionus angularis*
by J.E. Boxhorn, D.A. Holen & M.E. Boraas 283–287
Influence of abiotic and biotic factors on morphological variation of *Keratella cochlearis* (Gosse) in a small Andean lake
by M. Diéguez, B. Modenutti & C. Queimaliños 289–294

Part VIII. Autecology and Population Ecology

Diel variation in the egg ratio of *Hexarthra bulgarica* in the high mountain lake La Caldera (Spain)
by L. Cruz-Pizarro, J.M. Conde-Porcuna & P. Carrillo 295–300
Strategic variation of egg size in *Keratella cochlearis*
by J. Green 301–310
Relative investment in offspring by sessile Rotifera
by R.L. Wallace, J.J. Cipro & R.W. Grubbs 311–316

The paradox of bdelloid egg size
by S. Orsenigo, C. Ricci & M. Caprioli 317–320
Anhydrobiotic capabilities of bdelloid rotifers
by C. Ricci 321–326
Factors affecting long-term survival of dry bdelloid rotifers: a preliminary study
by A. Örstan 327–331
Some notes on *Brachionus rotundiformis* (Tschugunoff) in Lake Palaeostomi
by J. Haberman & M. Sudzuki 333–340
Effect of temperature and food concentration in two species of littoral rotifers
by I.A. Pérez-Legaspi & R. Rico-Martínez 341–348
Population growth in planktonic rotifers. Does temperature shift the competitive advantage for different species?
by C.-P. Stelzer 349–353
Carbon content of some freshwater rotifers
by I.V. Telesh, M. Rahkola & M. Viljanen 355–360

Part IX. Population Genetics

Review paper: Seasonal variation as a determinant of population structure in rotifers reproducing by cyclical parthenogenesis
by C.E. King & M. Serra 361–372
Review paper: Ecological genetics of *Brachionus*
by M. Serra, Á. Gómez & M.J. Carmona 373–384
Enzyme electrophoresis: its application to rotifers
by Á Gómez 385–393
Measurements of the genome size of the monogonont rotifer *Brachionus plicatilis* and of the bdelloid rotifers *Philodina roseola* and *Habrotrocha constricta*
by D.M. Welch & M. Meselson 395–402
Karyotypes of bdelloid rotifers from three families
by J.L.M. Welch & M. Meselson 403–407

Part X. Trophic Interactions

Does the evasive behavior of *Hexarthra* influence its competition with cladocerans?
by A. Kak & T. R. Rao 409–419
Colony size in *Conochilus hippocrepis*: defensive adaptation to predator size
by M. Diéguez & E. Balseiro 421–425
Spatial segregation between rotifers and cladocerans mediated by *Chaoborus*
by M.J. González 427–436
Morphotype-specific predation in the trimorphic rotifer *Asplanchna silvestrii*
by S.E. Hampton 437–444
Uptake of latex beads as size-model for food of planktonic rotifers
by D. Ronneberger 445–449

Part XI. Applied Studies and Aquaculture

Ecology versus taxonomy: is there a middle ground?
by D.L. Nielsen, R.J. Shiel & F.J. Smith 451–457
Ecological water quality assessment of the Bütgenbach lake (Belgium) and its impact on the River Warche using rotifers as bioindicators
by Y. Marneffe, S. Comblin & J.-P. Thomé 459–467
Size-structure dynamics of the rotifer chemostat: a simple physiologically structured model
by J.N. McNair, M.E. Boraas & D.B. Seale 469–476
Rotifer size distribution changes during transient phases in open cultures
by M.E. Boraas, D.B. Seale, J.E. Boxhorn & J.N. McNair 477–482
Influence of the food ration and individual density on production efficiency of semicontinuous cultures of *Brachionus*-fed microalgae dry powder
by N. Navarro & M. Yúfera 483–487
Effect of water viscosity on the population growth of the rotifer — *Brachionus plicatilis* Müller
by A. Hagiwara, N. Yamamiya & A. Belem de Araujo 489–494
Probiotic culture of the rotifer *Brachionus plicatilis*
by H. Hirata, O. Murata, S. Yamada, H. Ishitani & M. Wachi 495–498
